Using browser add-ons

Browser add-ons that block ads or trackers may have an unintentional impact on our online services.

For example, some ad-blockers block content based on certain key words (such as 'ad' or 'advertising'). MyTax references occupation types that contain these words, for example, 'advertising manager'. This means that the ad-blocker may misinterpret 'advertising manager' as advertising content and prevent myTax from loading.

Your browser add-on may also identify components of our online services as trackers. Common components we use include:

- Google analytics/Google tag manager we use Google analytics to understand how our online services are being used so we can make improvements as needed. No identifying information is collected (see Web browsing records – ATO privacy policy).
- **Qualtrics Site Intercept** we use this to ask you to complete surveys and submit feedback about our online services.
- Atoonlinecdnstream.azurenet.net this is not a tracker and is required for our online services. You won't be able to use our online services if this is blocked.
- **Omnichannel.ato.gov.au** this is used to support the webchat feature in myTax.
