Taxation statistics 2022–23

Taxation statistics 2022–23 shows statistics from tax returns and related schedules for the 2022–23 income year.

Published 27 June 2025

Taxation statistics is the ATO's most comprehensive statistical publication. It contains statistics from income tax returns and related schedules for the 2022–23 income year for:

- individuals
- companies
- super funds
- partnerships
- trusts
- industry benchmarks.

This publication also includes information relating to the 2023–24 financial or fringe benefits tax year, including:

- goods and services tax (GST)
- excise and fuel schemes
- fringe benefits tax (FBT).

The full list of topics is available at [Statistics](#). You can also read about how to [navigate taxation statistics](#).

Changes this year include:

- the inclusion of a new company detailed table, splitting data from the company returns by entity size as well as taxable income or loss

range

- extra data in our GST and excise detailed tables, including monthly GST, wine equalisation tax and luxury car tax data items, as well as Customs excise collections.

We encourage feedback on how we present this information and what we include. Email your suggestions to us at taxstats@ato.gov.au.

You can also refer to:

- *Taxation statistics* dating back to 2011–12
- historical *Taxation statistics* [dating back to 1994–95](#) ↗

Navigating Taxation statistics 2022–23

Help to understand the ATO's Taxation statistics 2022–23 by setting out how to use our tables, charts and index.

Published 27 June 2025

Our tables and charts

In the ATO's *Taxation statistics 2022–23*, we provide a brief overview of topics using summary tables and charts. You can access the full datasets in Excel format at [data.gov.au](#) by selecting the link under the table or chart. In **data.gov.au**, select the **Download** button, then open or save the file.

The data in our summary tables and charts for previous years is not updated and remains as originally published for that year. This allows for a quick year-on-year point-in-time comparison.

Detailed tables contain substantially more data than summary tables and charts. They contain statistics for most labels on our most common return forms and schedules.

In general, income year statistics in our detailed tables are updated for the previous 2 years. Financial year statistics are not updated. The notes accompanying our detailed tables will specify what data is included.

Using the index

The [index](#) includes all item and label descriptions and shows which detailed tables they appear in. It includes links to each detailed table for:

- individuals
- companies
- super funds
- partnerships
- trusts
- fringe benefits tax (FBT).

Changes in data over time

We recommend caution when comparing statistics from current and previous income years.

When doing year-on-year analysis, you should be aware that:

- Each year we receive lodgments, amendments or cancellations after the processing cut-off date for the data in the previous publication.
- Changes in legislation (such as changing income tax rates or thresholds) can impact taxation levels from year to year.

Comparison with other publications

The data in *Taxation statistics* may be different compared to other publications. There are 2 main reasons for this:

- Our data cut-off date is 31 October, 16 months after the end of the financial year. During this time most returns are already lodged and processed. Other publications may include more recent lodgments.
- Items may be calculated using different methods. We explain our calculations in *Definitions and calculations*.

Published 27 June 2025

Snapshot

A summary of information reported from tax returns, activity statements and other forms in Taxation statistics 2022–23.

Industry benchmarks

Industry benchmarks are financial and activity statement ratios

Individuals statistics

Statistics on most labels from the Individuals tax return and superannuation accounts.

Company statistics

Key statistics from company income tax returns and international dealings schedules

Super fund statistics

Key statistics from fund income tax returns and self-managed super fund annual returns.

Partnership statistics

Key statistics from partnership income tax returns.

Trust statistics

Key statistics from trust tax returns.

Capital gains tax statistics

Capital gains tax (CGT) statistics are extracted from processed income tax returns and CGT schedules.

GST and other tax statistics

Goods and services tax (GST) statistics are sourced from business activity statements and GST annual returns.

Fringe benefits tax statistics

Key statistics from Fringe benefits tax (FBT) returns.

Excise and fuel scheme statistics

Key statistics for excise and fuel schemes, relating to liabilities for the most recent financial year.

Pay as you go statistics

Key statistics relating to Pay as you go (PAYG) withholding liabilities or payments.

Cost of tax compliance statistics

Key cost of tax compliance statistics from income tax returns, FBT returns and activity statements.

Charity statistics

Information relating to charities, ancillary funds and deductible gift recipients.

Industry benchmarks for Taxation statistics 2022–23

Industry benchmarks are financial and activity statement ratios calculated from tax returns and activity statements.

Published 27 June 2025

Overview

Industry benchmarks used in the ATO's *Taxation Statistics 2022–23* are financial and activity statement ratios calculated from information provided to us on tax returns and activity statements.

Industry benchmarks can be used to:

- analyse business activity and performance

- identify businesses who vary significantly from industry averages.

We produce separate benchmarks for:

- individuals
- companies
- partnerships
- trusts.

We also produce a set of benchmarks that combines data for individuals, companies, partnerships and trusts together.

Two sets of ratios – one for all entities and one for profitable entities – are produced for each of the following 3 levels of industry:

- broad industry
- fine industry
- business industry code.

The industry grouping is based on the industry codes provided on tax returns. Some tables are further divided by business status – new or established businesses – while others are broken down by business income ranges. For each sub-population, we show the:

- number of entities
- average ratio
- median ratio.

Along with the industry benchmarks, we also produce **small business benchmarks** for selected industries. These benchmarks are slightly different and are only for businesses whose turnover is up to \$15 million.

Caution when using industry benchmarks

These benchmarks are not definitive and should not be used in isolation. For example, some businesses' ratios may vary from the industry averages. Conversely, businesses' ratios close to the industry averages may have compliance problems or other financial difficulties.

A ratio calculated using a large population is generally more reliable than one calculated from a small one.

In any analysis, there are times when misleading results can be produced. For example, when:

- amounts listed at tax return labels appear to be an error, or unexpected, like when cost of sales or total expenses are zero
- businesses are too small, like when total income is less than \$10,000
- the ratios for a single entity are exceptional and would distort the calculation of an industry average.

In our calculations we exclude records like these, to prevent unwanted impacts. For more information, refer to [Table 1](#).

Financial ratios

We use data from tax returns to calculate the following financial ratios industry benchmarks:

- **Net profit ratio** = $(\text{Total business income} - \text{Total expenses}) \div \text{Total business income}$
- **Gross profit ratio** = $(\text{Total business income} - \text{Cost of sales}) \div \text{Total business income}$
- **Wage to turnover ratio** = $\text{Salary and wages paid} \div \text{Total business income}$
- **Expense to turnover ratio** = $\text{Total expenses} \div \text{Total business income}$

Activity statement ratios

We use data from business activity statements to calculate the following activity statement ratios industry benchmarks:

- **Net GST to sales ratio** = $(\text{GST on sales} - \text{GST on purchases}) \div \text{Total sales}$
- **Wages to sales ratio** = $\text{Total salary and wages} \div \text{Total sales}$

Industry benchmarks detailed tables

Our detailed industry benchmark data is stored on data.gov.au and can be accessed by the following links.

Table 5: Individuals – Selected income items, 2021–22 to 2022

Income item	Individuals no. 2021–22	Average \$ 2021– 22	Median \$ 2021– 22	Individuals 2022
Salary or wages	12,405,198	69,994	58,337	12,844
Gross interest	7,701,751	387	19	10,211
Allowances, earnings, tips, director's fees, etc.	3,409,946	2,749	319	4,291
Dividends – franked amount	2,748,569	12,178	549	3,041
Dividends – franking credit	2,735,406	4,904	238	3,011
Net rent	2,291,362	2,608	1,070	2,281
Partnerships and trusts – net non-	2,091,627	36,113	3,402	2,121

primary production amount				
Net income or loss from business – non-primary	1,529,347	28,391	11,750	1,61
Dividends – unfranked amount	1,194,535	1,309	166	1,31
Assessable foreign source income	1,151,149	7,156	197	1,20
Net capital gain	1,414,379	35,764	1,901	1,12
Other net foreign source income	1,016,543	4,028	124	1,06
Australian Government allowances and payments like Newstart, Youth Allowance and Austudy payment	1,285,113	7,728	6,867	1,00
Australian Government pensions	694,880	13,685	14,746	70

and allowances				
Total income or loss	15,535,395	75,547	55,540	16,108

In Table 5:

- **Total income or loss** components don't add to the total number of individuals because individuals may declare more than one type of income
- some components of total income are not listed
- the calculations for count, average and median for total income or loss include zeros.

Download data from the 2007–08 income year onward at [Snapshot table 4 ↗](#).

Table 6: Individuals – Selected deductions, 2021–22 to 2022–23

Deduction item	Individuals no. 2021– 22	Average \$ 2021– 22	Median \$ 2021– 22	Indi- viduals no. 2021– 22
Work-related expenses	9,862,294	2,506	1,342	10,000
Other expenses incurred in managing your tax affairs	5,843,359	352	188	6,000
Gifts or donations	4,265,874	1,067	148	4,000
Personal superannuation contributions	652,281	17,648	15,000	7,000

Other deductions	661,871	3,760	1,894	
Dividend deductions	336,623	2,392	295	
Interest charged by ATO	191,030	2,164	527	
Low value pool deduction	274,902	389	161	
Interest deductions	124,537	3,493	250	
Total deductions	15,535,395	3,037	837	16

In Table 6:

- **Other deductions** is a label on the tax return and doesn't include all other deductions from the tax return not listed
- **Total deductions** components don't add up to the total number of individuals claiming deductions because individuals may claim more than one type of deduction
- some components of total deductions are not listed
- the calculations for count, average and medians for total deductions include zeros.

Chart 10: Individuals – rental income and deductions, 2018–19 to 2022–23 income years

 Rental income, deduction items and net rental income for individuals for the 5 income years from 2018–19 to 2022–23 show an increase until 2021–22 with a drop in 2022–23. Details are in the link below to Snapshot table 5.

Download data from the 2009–10 income year onward at [Snapshot table 5 ↗](#).

Table 8: Individuals – interest in a rental property, by over 22 to 2022–23 income years

Property interests no.	Net rent loss no. 2021–22	Net rent neutral or profit no. 2021–22	Total individuals no. 2021–22	Net rent loss no. 2022–23
1	688,312	932,351	1,620,663	810,875
2	177,357	250,663	428,020	208,978
3	52,274	80,064	132,338	60,718
4	17,747	29,886	47,633	20,602
5	7,024	12,506	19,530	8,163
6 or more	6,805	13,172	19,977	7,839
Total	949,519	1,318,642	2,268,161	1,117,175

In Table 8, **Property interests** implies solely or jointly owned properties, including those bought or sold during the year.

Download data from the 1999–2000 income year onward at [Snapshot table 4 ↗](#).

Table 9: Individuals – workplace giving programs, 2020–21 to 2022–23 income years

Workplace giving	2020–21	2021–22	2022–23

item			
Total employees employed by workplace giving employers no.	4,326,985	4,759,945	4,399,988
Employees using workplace giving no.	206,954	204,458	192,490
Total donations given using workplace giving \$m	53	50	44
Average donation \$	258	245	231
Median donation \$	100	85	94

In Table 9, individuals may be counted more than once if they changed jobs during the same income year.

Download data from the 2009–10 income year onward at [Snapshot table 4](#).

Chart 11: Individuals – gifts or donations, by state or territory, 2022–23 income year

 Median donation: ACT 245, NSW 170, VIC 130, NT 120, QLD 120, SA 120, WA 120, TAS 103.

Download data from the 2009–10 income year onward at [Snapshot table 5](#).

Chart 12: Individuals – median super balance, by age and sex, 2022–23 financial years

 The median super account balance rises until 60-64 years old for males and 70-74 years old for females. Full details are in the link below to Snapshot table 5.

In Chart 12, statistics include individuals with an account balance or current year contributions greater than zero.

Download data from the 2013–14 financial year onward at [Snapshot table 5](#).

Chart 13: Individuals – super balance, by state or territory and sex, 2022–23 financial years

 The median superannuation balance is higher for males than females in all states and territories, with the ACT in the lead. Details are in the link below to Snapshot table 5.

In Chart 13, statistics include individuals with an account balance or current year contributions greater than zero.

Download data from the 2013–14 income year onward at [Snapshot table 5](#).

Table 10: Individuals – super balance, by taxable income range, financial years

Taxable income	Individuals no. 2021–22	Average account balance \$ 2021–22	Median account balance \$ 2021–22	Individuals no. 2021–22
\$18,200 or less	1,849,779	161,473	21,374	1,820,447
\$18,201 to \$45,000	3,556,433	98,453	17,127	3,467,710
\$45,001 to \$120,000	6,656,624	142,818	70,374	7,027,633

\$120,001 to \$180,000	1,300,483	295,925	178,728	1,504,1
\$180,001 or more	744,675	573,053	303,980	833,0
No income tax return	3,057,652	132,854	40,888	3,239,1
Total	17,165,646	164,126	57,912	17,892,6

In Table 10, only individuals with a superannuation account balance greater than zero are included. The average and median are calculated excluding zeros.

Individuals postcode maps

Postcode level data for the 2011–12 to 2022–23 income years is available in the [Digital Atlas of Australia](#).

The Digital Atlas connects trusted national data on Australia's geography, people, economy and environment in a central platform.

You can zoom in and click on a postcode area to show averages and median values for:

- taxable income or loss
- salary and wages
- net rent
- total income or loss
- total deductions
- total business income
- total business expenses
- net tax
- superannuation balance.

You can also compare the proportion of individuals claiming some of these items by postcode.

Individuals sample files

If you want to undertake modelling or research, we have a series of sample files of individual tax return information. The files are de-identified to protect the identities of individual taxpayers.

For the income years 2003–04 to 2010–11, the files are a 1% sample.

From 2011–12 onwards, the files are a 2% sample.

The items in the sample file are listed in the [Individuals sample file index](#).

To request access to our individual sample files, email taxstats@ato.gov.au.

Company statistics for Taxation statistics 2022–23

Key statistics from company income tax returns and international dealings schedules

Published 27 June 2025

Company summary tables and chart

Key statistics from the *Company tax return 2023* summarised in the ATO's *Taxation statistics 2022–23* follow.

- [Table 11: Companies – Selected income items](#) – over 2 years
- [Table 12: Companies – Selected expenses](#) – over 2 years
- [Chart 14: Number of companies and net tax by size](#)

Table 11: Companies – Selected income items, 2021–22 to

Income item	Companies no. 2021–22	Average \$ 2021–22	Median \$ 2021–22	Com no.
-------------	-----------------------	--------------------	-------------------	---------

Other gross income	561,082	1,106,699	60,000	1
Other sales of goods and services	492,786	6,256,433	358,125	5
Gross interest	417,177	323,984	438	4
Gross distribution from trusts	100,735	623,451	116,228	1
Gross rent and other leasing and hiring income	76,982	556,302	44,668	
Total dividends	62,269	1,841,534	12,800	
Total income	1,189,608	3,465,999	141,490	1,2

In Table 11:

- **Total income** components don't add to the total number of companies because companies may declare more than one type of income
- some components of total income are not listed
- the calculations for count, average and median for total income include zeros.

Download data from the 2001–02 income year onward at [Snapshot table 4 ↗](#).

Table 12: Companies – Selected expenses, 2021–22 to 2022–23

Expense item	Companies no. 2021–22	Average \$ 2021–22	Median \$ 2021–22	Count
All other expenses	1,077,432	1,113,427	62,584	6,258
Motor vehicle expenses	510,280	33,838	8,775	8,775
Depreciation expenses	501,649	300,702	11,620	11,620
Superannuation expenses	494,706	98,346	16,470	16,470
Cost of sales	405,840	4,204,696	154,983	154,983
Interest expenses within Australia	364,377	157,303	3,470	3,470
Repairs and maintenance	374,239	81,081	2,903	2,903
Rent expenses	347,836	127,658	33,390	33,390
Contractor, subcontractor and commission expenses	231,982	669,748	40,336	40,336
Total expenses	1,189,608	2,980,962	98,085	6,258

In Table 12:

- **All other expenses** is a label on the tax return and doesn't include all other expense items from the tax return not listed
- **Total expenses** components don't add to the total number of companies claiming expenses because companies may claim more than one type of expense
- some components of total expenses are not listed
- the calculations for count, average and median for total expenses include zeros.

Reference material for Taxation statistics 2022–23

Use our reference material to get the most from the ATO's *Taxation statistics 2022–23*.

Published 27 June 2025

Definitions and calculations

We explain key terms and calculations used in *Taxation statistics 2022–23* as follows.

Entity size

An entity is an individual, company, fund, self-managed fund, partnership or trust. We base our entity size on the amount of **Total business income** reported.

Entity size classification

Entity size	Total business income
Loss	less than \$0
Nil	equal to \$0
Micro	\$1 to less than \$2 million
Small	\$2 million to less than \$10 million
Medium	\$10 million to less than \$100 million
Large	\$100 million to less than \$250 million
Very large	\$250 million or more

Total business income is the amount:

- an **individual** showed at the Total business income label on the Business and professional items 2023
- a **company** showed at the Total income label (item 6, label **S**) on the Company tax return 2023
- a **fund** showed at the Total assessable income label (item 10, label **V**) on the Fund income tax return 2023
- a **self-managed super fund** showed at the Total assessable income label (item 11, label **V**) on the Self-managed superannuation fund annual return 2023

- a **partnership or trust** showed at the Total business income label (item 5) on the Partnership tax return 2023 or Trust tax return 2023.

Calculating net tax

Net tax is essentially the amount of tax owed for the income year, before applying refundable credits. It may not be the amount of tax payable or refundable on a notice of assessment.

A taxable entity is one whose net tax is more than \$0. A non-taxable entity is one whose net tax is \$0.

We calculate net tax differently for the following entities:

- individuals
- companies
- super funds.

Individual calculation

Some values in the calculations below are labels or totals on the Tax return for individuals 2023.

Step 1:

- **Taxable income or loss** = Total income or loss – Total deductions – Tax losses of earlier income years

Step 2:

- **Tax on taxable income** = Taxable income or loss × Individual tax rates

Step 3:

- **Net tax** = Tax on taxable income + Extra income tax – Total non-refundable tax offsets + Medicare levy + Medicare levy surcharge – Remaining foreign income tax offset
- for Step 3
 - **Extra income tax** is any additional tax you need to pay
 - **Remaining foreign income tax offset** is a non-refundable tax offset. It can only be applied to reduce a liability to nil. It can't result in a refund.

Company calculation

Some labels are in the Company tax return 2023.

Step 1:

- **Total profit or loss** = Total income (item **S6**) – Total expenses (item **6Q**)

Step 2:

- **Taxable income** = Total profit or loss (item **6T**) + or – Reconciliation items (item **7**)

Step 3:

- **Gross tax** = Taxable or net income (calculation statement: item **A**) × Relevant company tax rate + R&D recoulement tax (calculation statement: item **M**)

Step 4:

- **Net tax** = Gross tax (calculation statement: item **B**) – Non-refundable non-carry forward tax offsets (Calculation item **C**) – Non-refundable carry forward tax offsets (Calculation statement item **D**) – Franking deficit tax offset (calculation statement item **F**)

Super fund calculation

These items are labels on the Fund income tax return 2023 and Self-managed superannuation fund annual return 2023 respectively.

Step 1:

- **Taxable income or loss** = Total assessable income (item **10V/11V**) – Total deductions (item **11N/12N**)

Step 2:

- **Gross tax** = Taxable income or loss (item **11O/12O**) × Fund type specific tax rate + Tax on no-TFN quoted contributions (item **12J/13J**)

Step 3:

- **Net tax** = Gross tax (item **12B/13B**) – Non-refundable non-carry forward tax offsets (item **12C/13C**).

Estimating tax on net capital gains

In *Taxation statistics*, the tax on net capital gains is an estimate of the tax required to be paid, based on an average tax rate approach.

Estimated tax on net capital gains = Net tax ÷ Taxable income × Net capital gain.

Estimating business net tax

In *Taxation statistics*, business net tax is an estimate of the amount of net tax attributable to net business income. Business net tax is only calculated for taxable individuals with net business income and taxable income.

Estimated business net tax = Net income or loss from business (sum of items **15B** and **15C**) ÷ Taxable income × Net tax

- The items are labels on the Business and professional items 2023 schedule
- Where the proportion calculated above is greater than one, it is changed to one.

Calculating net GST

Net GST = Gross GST payable + Deferred GST payments on imports – Input tax credits

The net GST amount on the activity statement can also be affected by increasing and decreasing adjustments.

Tax return forms and other relevant publications

This is a list of all tax return forms, associated instructions and guides and other publications referred to in this edition of *Taxation statistics*.

Return forms, schedules and instructions:

- Tax return for individuals and instructions 2023
- Tax return for individuals (supplementary section) and instructions 2023
- Company tax return and instructions 2023
- Fund income tax return and instructions 2023

- Self-managed superannuation fund annual return and instructions 2023
- Partnership tax return and instructions 2023
- Trust tax return and instructions 2023
- International dealings schedule and instructions 2023
- Fringe benefits tax return and instructions 2024

Other guides:

- Guide to capital gains tax 2023
- Rental properties 2023
- Business and professional items 2023

Activity statements and GST:

- Annual GST return instructions
- Business activity statements (BAS) instructions
- Business activity statements (BAS) forms
- Instalment activity statement forms

Other publications:

- Business industry code tool
- Salary and wage occupation codes 2023
