1544 Transitional—variation of conditions on Australian financial services licences

Scope

- (1) This section applies if, as at the end of the designated carbon unit day, an Australian financial services licence is subject to a condition that authorises the financial services licensee to provide financial services in relation to financial products that are carbon units.

Variation

- (2) After that day, subsections 914A(3), (4) and (5) do not apply in relation to a variation of the condition, if the only effect of the variation is to remove the authorisation to provide financial services in relation to financial products that are carbon units.

1545 Transitional—immediate cancellation of Australian financial services licences

Section 915B applies, on and after the designated carbon unit day, as if the following subsection was added at the end of the section:

Licence relating to carbon units

- (5) ASIC may cancel an Australian financial services licence held by a person, by giving written notice to the person, if the licence only authorises the person to provide financial services that relate to financial products that are carbon units.

1546 Transitional—statements of reasons for cancellation of Australian financial services licences

Section 915G does not apply to a cancellation under subsection 915B(5) (as inserted by section 1545).

Fuel Tax Act 2006

108 Section 2-1

Omit:

This Act provides a single system of fuel tax credits. Fuel tax credits are paid to reduce the incidence of fuel tax levied on taxable fuels, ensuring that, generally, fuel tax is effectively only applied to:

- (a) fuel used in private vehicles and for certain other private purposes; and
- (b) fuel used on-road in light vehicles for business purposes.

For fuel that is not *covered by the Opt-in Scheme, the fuel tax credit entitlement is (with some exceptions) reduced by an amount equivalent to what the carbon price on the fuel emissions would be (if those emissions were subject to a carbon price). For fuel that is covered by that Scheme, the entitlement is not so reduced.

Fuel tax credits are also provided for fuel for use in aircraft if the fuel is covered by the Opt-in Scheme. The amount of the credit is limited to the carbon component rate that was factored into the rate of fuel tax.

Fuel tax credits are also provided for gaseous fuel that is subject to the carbon pricing mechanism if the fuel is for use in agriculture, fishing operations or forestry. The amount of the credit is the amount of the carbon charge that is embedded in the price of the fuel.

substitute:

This Act provides a single system of fuel tax credits. Fuel tax credits are paid to reduce or remove the incidence of fuel tax levied on taxable fuels, ensuring that, generally, fuel tax is effectively only applied to:

- (a) fuel used in private vehicles and for certain other private purposes; and
- (b) fuel used on-road in light vehicles for business purposes.

111 Section 41-1

However, fuel tax credits are denied under Subdivision 41-B if:

- (a) another person is already entitled to a fuel tax credit in respect of the fuel; or
- (b) the fuel is for use on-road in light vehicles; or
- (c) the fuel is for use in vehicles that do not meet certain environmental criteria; or
- (d) the fuel is for use in aircraft, and is not covered by the Opt-in Scheme.

substitute:

However, fuel tax credits are denied under Subdivision 41-B if:

- (a) another person is already entitled to a fuel tax credit in respect of the fuel; or
- (b) the fuel is for use on-road in light vehicles; or

- (b) for fuel that is not covered by the Opt-in Scheme—reduced (with some exceptions) to take account of what the carbon price on the fuel emissions would be (if those emissions were subject to a carbon price).

For fuel for use in aircraft that is covered by the Opt-in Scheme, the amount of the credit is reduced so that it is limited to the carbon component rate that was factored into the rate of fuel tax.

For gaseous fuel that is subject to the carbon pricing mechanism, the amount of the credit is the amount of the carbon charge that is embedded in the price of the fuel.

substitute:

The amount of your credit for taxable fuel is the amount of fuel tax that was payable on the fuel, reduced to take account of certain grants and subsidies that were payable in respect of the fuel (as the grants or subsidies reduced the amount of fuel tax that effectively applied to the fuel).

 - (a) is issued more than 12 months after the day on which the contravention of the infringement notice provision is alleged to have occurred; or
 - (b) relates to more than one alleged contravention of an infringement notice provision by the person.

Matters to be included in an infringement notice
