12. Paragraph 7

Omit the heading; substitute '**Accumulation phase value – Step 1**'.

13. Paragraph 8

Omit the paragraph and footnotes; substitute:

8. A superannuation interest will be in retirement phase if it supports a superannuation income stream that is in the retirement phase at that time.¹⁴ This will be the case if the interest:

- supports a superannuation income stream where a superannuation income stream benefit is currently payable from it (subject to paragraph 8A of this Guideline)¹⁵ or
- if it is a deferred superannuation income stream¹⁶ that has not yet become payable but the member has met a relevant condition of release (such as retirement, terminal medical condition, permanent incapacity, or attaining age 65).¹⁷

8A. Certain superannuation income streams are excluded from the retirement phase by operation of the law, either because the law specifically excludes the superannuation income stream from being in the retirement phase or because the superannuation income stream fails to meet the definition of a superannuation income in the retirement phase.¹⁸ The following superannuation income streams are excluded from being in retirement phase and are therefore in accumulation phase:

¹⁰ Paragraph 307-230(1)(b).

¹¹ Subsection 307-230(4).

¹² Paragraph 307-230(1)(c). Subsection 995-1(1) provides that a 'roll-over superannuation benefit' has the meaning given by section 306-10.

¹³ Subsection 294-80(2).

¹⁴ Paragraph (b) of the defined term retirement phase in subsection 995-1(1).

¹⁵ Subsection 307-80(1).

¹⁷ Paragraph 307-80(2)(c).

¹⁸ Subsection 307-80(3) and (4).

- a deferred superannuation income stream that has not yet become payable and the member has not yet met a relevant condition of release is included in the accumulation phase value. For example if you purchase a deferred superannuation income stream before meeting a relevant condition of release it will form part of the accumulation phase value until you meet a relevant condition of release or it starts to become payable.
- transition to retirement income streams, transition to retirement income pensions, non-commutable allocated annuities and non-commutable allocated pensions¹⁹
- superannuation income streams that stop being in the retirement phase.²⁰

Step 4 – *Structured settlement contributions = zero*

Substitute:

The credit to Shane's transfer balance account relevant to his defined benefit lifetime pension is not disregarded.

Modified transfer balance is \$1,000,000 – \$500,000 + \$400,000 = \$900,000.

		Credit	Debit	Balance
1 May 2018	Account-based pension	\$200,000		\$200,000
1 May 2018	Lifetime pension	\$1,000,000		\$1,200,000
1 May 2018	Structured settlement contributions		\$1,200,000	\$0

- (a) Disregard the amount of the credit that has arisen in respect of the account-based pension (\$200,000).
- (b) The debit arising from the structured settlement contribution is not disregarded.
- (c) Increase the balance by the amount that would become payable if the account-based pension voluntarily ceased at the end of 30 June 2018 (\$195,000).

\$470,000-\$470,000+\$470,000 = \$470,000*

Step 3 – *Roll-over superannuation benefits = zero*

Step 4 – *Structured settlement contributions = zero*

Substitute

(b) *Increase the balance by the amount that would become payable if the account-based pension voluntarily ceased just after the start of 1 July 2017 (\$470,000).*

*Transitional modified transfer balance at 30 June 2017 is \$470,000 -

Step 1 – *Accumulation phase value = \$0*

Step 2 – *Modified transfer balance*

The earliest that Cameron can commence to have a transfer balance account is 1 July 2017.

The transitional arrangements apply so that his transitional transfer balance at the end of 30 June 2017 is equal to the sum of his transfer balance credits just after the start of 1 July 2017 less the debit for his payment split that arose on 1 July 2017.

Cameron's transitional transfer balance just after the start of 1 July 2017 is \$1,240,000.⁴²⁴²

		Credit	Debit	Balance
1 July 2017	Defined benefit lifetime pension	\$600,000		\$600,000
1 July 2017	Payment split		\$360,000	\$240,000
1 July 2017	Account-based pension	\$1,000,000		\$1,240,000

- (a) *Disregard the amount of the credit that has arisen in respect of the account-based pension just after the start of 1 July 2017 (\$1,000,000).*
- (b) *Increase the balance by the amount that would become payable if the account-based pension voluntarily ceased just after the start of 1 July 2017 (\$1,000,000).*

Transitional modified transfer balance at 30 June 2017 is \$1,240,000 - \$1,000,000 + \$1,000,000 = \$1,240,000

Step 3 – *Rollover superannuation benefits = \$0*

Step 4 – *Structured settlement contributions = \$1,200,000*

46. Paragraph 63

At the end of the first sentence, delete '(steps 1, 2 and 3 reduced by step 4)'.
