## Draft Taxation Determination

---

### **Fringe benefits tax: can the exemption for 'fly-in fly-out' transport in subsection 47(7) of the *Fringe Benefits Tax Assessment Act 1986* apply, where the employees take a rest day during their time at the work site?**

Yes. Where the other conditions of subsection 47(7) are met, this Office will accept that the break in the working days does not affect the availability of the exemption for the transport of the employees to and from their usual place of residence.

#### *Example*

*Builder Pty Ltd operates a construction site at a remote locality. Employees are transported to the site from their homes in the capital city at the start of their three week work cycle, and are returned home again for their one week off cycle. The applicable Mines Regulations specify that employees must take one day off after working 13 consecutive days. The fact that employees have this day off will not jeopardise the exemption available under subsection 47(7).*
