IMPUTATION OF
COMPANY TAX

DIVIDEND STATEMENT
TO SHAREHOLDERS

160AQH

160AQT

PREAMBLE A new system of taxing company dividends known as the "Imputation System" has effect from 1 July 1987. Under this system, a dividend paid by an Australian resident company will have an imputation credit attached to it, to the extent of the Australian income tax borne at the company level.

2. Dividends with an imputation credit attached are called "franked dividends", and the extent to which they are franked is known as the "franked amount". The taxation treatment of franked dividends depends upon the taxation status of the recipient shareholder.

3. Individual resident shareholders will include the actual dividend paid as assessable income as in the past. In addition, an extra amount (equal to the imputation credit) will be included as assessable income, but a rebate of tax equal to this extra amount will be allowed in the shareholder's assessment.

4. Resident company shareholders will also include the actual dividend paid as in the past and, where appropriate, claim a section 46 rebate in respect of the dividend. While the imputation credit is not included in the assessable income of resident companies, the franked amounts of dividends paid to these companies are credited to their own franking accounts.

5. Non-resident shareholders will not be liable to withholding tax in relation to the franked amount of franked dividends received, but will be liable to withholding tax on the unfranked amount of dividends received.

FACTS

6. Section 160AQH of the Income Tax Assessment Act requires a resident company to give to shareholders, either before or at the time of payment of a dividend, a statement that includes the following details:

- (a) if the dividend is not franked - a declaration to that effect;
- (b) if the whole or part of the dividend is franked then:
 - (i) the franked amount of the dividend;
 - (ii) the amount remaining after deducting the franked amount from the amount of the dividend (i.e. the unfranked amount);
 - (iii) the gross-up amount calculated in accordance with section 160AQT, i.e. 49/51 times the franked amount (i.e. the imputation credit);
 - (iv) any amount of withholding tax deducted from the dividend under section 221YL; and
- (c) any other information required on the approved form of shareholder dividend statement.

RULING

7 For the purpose of paragraph (c) above, the following additional information is required on the shareholder dividend statement:

- (a) the name of the company paying the dividend;
- (b) the date of payment of the dividend;
- (c) the name of the shareholder; and
- (d) in the case of a franked dividend, whether it is fully or partially franked.

8. Approval is granted for resident companies to use their own shareholder dividend statement providing it is substantially in accordance with one of the approved forms of the statement set out in Appendix "A" to this Ruling. Alternatively, the required information may be incorporated in to existing dividend warrants.

9. Requests for approval of any substantial variation of the shareholder dividend statement format should be directed to the Deputy Commissioner of Taxation at the office at which the company lodges its income tax returns.

Decimal Places on Shareholder Dividend Statement

10. In the event of a company paying a partially franked dividend, it is possible that calculation of the percentage apportionment between the franked and unfranked components may run to more than two decimal places. For the purposes of recording the franked and unfranked components respectively on the shareholder dividend statement, these calculations may be rounded off to the nearest cent. The amount of the imputation credit may also be rounded off to the nearest cent. However, this amount must be calculated having regard to the franked amount of the dividend prior to rounding.

COMMISSIONER OF TAXATION
22 June 1987

Form 1 (Partially franked dividends or general use)

SHAREHOLDER DIVIDEND STATEMENT

Name of company:
Date of payment:
Name of shareholder:

Dividend type			Imputed Credit	
FRANKED/UNFRANKED	\$	C	\$	C
Franked amount				
Unfranked amount				

Withholding Tax (only where
dividend paid to non-residents)

--	--

Note: You will need to retain the above information to assist you in preparing your income tax return.
