Superannuation Contributions Determination

Superannuation contributions: what is the surcharge threshold for the 2000-2001 financial year under the *Termination Payments Tax (Assessment and Collection) Act 1997*?

Preamble

Superannuation Contributions Determinations (SCDs) do not have the force of law. Each decision made by the Australian Taxation Office is made on the merits of the individual case having regard to any relevant Rulings and Determinations.

1. The *Termination Payments Tax (Assessment and Collection) Act 1997* (the TPT(AC)A) provides that for each financial year the surcharge threshold is to be an amount which reflects movements in full-time adult average weekly ordinary time earnings (AWOTE).
2. To ascertain the surcharge threshold, an indexation factor is calculated by dividing the index number for the last quarter in the current March year by the index number for the last quarter in the previous March year. The index number for a quarter is the AWOTE estimate for the middle month of the quarter published by the Australian Statistician.
3. The Australian Statistician's AWOTE estimate for February 2000 was \$774.80 and the estimate for February 1999 was \$743.80. This produces an indexation factor of 1.042. This factor, when multiplied by the surcharge threshold for the previous year, produces the surcharge threshold for the current year.
4. Superannuation Contributions Determination SCD 1999/4 specified the previous surcharge threshold for the 1999-2000 financial year as \$78,208.
5. For the purposes of subsection 10(2) of the TPT(AC)A, the surcharge threshold for the 2000-2001 financial year is:

\$81,493.
