- FACTS The "Little Crib Concert" is a musical toy designed for attachment to a child's cot and plays several different tunes. The music is reproduced by electronic circuitry which is centred around a silicon chip containing the tunes. - RULING The "Little Crib Concert" which produces music 2. electronically by means of a silicon chip does not incorporate "musical movements" for the purposes of item 43, Second Schedule. It is therefore taxable at the general rate, presently 20%.
