TAXATION RULING NO. ST 2447

SALES TAX: MICROFILM CAMERAS USED TO PHOTOGRAPH DOCUMENTS AND CUSTOMERS SIMULTANEOUSLY

F.O.I. EMBARGO: May be released

N.O. REF: 88/5438-6 DATE OF EFFECT: Immediate B.O. REF: DATE ORIG. MEMO ISSUED: F.O.I. INDEX DETAIL REFERENCE NO: SUBJECT REFS: LEGISLAT. REFS: I 1211476 CAMERAS SALES TAX (EXEMPTIONS MICROFILM AND CLASSIFICATIONS) ACT; ITEM 36, SECOND SCHEDULE

This Ruling considers the classification of a microfilm PREAMBLE camera used as a security measure by hire companies etc., to simultaneously record documents and the person involved in the document transaction.

> Item 36 in the Second Schedule to the Sales Tax (Exemptions 2. and Classifications) Act taxes at 30% cameras and machines for taking photographs, but not including photographic equipment of a kind used exclusively or primarily and principally in the reproduction of documents, drawings and plans.

FACTS 3. The camera is a dual lens optical camera that is mounted on a column with a base. The unit is free standing and ordinarily is placed on the counter where transactions take place. It is 300mm wide, stands 540mm high and is 280mm in depth.

> 4. In operation, when a transaction takes place at the counter, the system will photograph both the document being completed and the person involved with the document. The system uses 16mm microfilm loaded in a tamper-proof cassette which provides 2000 pictures. It is sold as a fraud deterrent and for its capacity to provide identification and evidence following a crime.

RULING 5. The camera is a microfilm camera of a kind used exclusively, or primarily and principally, in the reproduction of documents. It is not covered by item 36, Second Schedule and is taxable at the general rate of 20%.
