Taxation Determination

Fringe benefits tax: what is the benchmark interest rate to be used for the fringe benefits tax (FBT) year commencing on 1 April 1999?

Preamble

The number, subject heading, date of effect and paragraphs 1 and 2 of this Taxation Determination are a 'public ruling' for the purposes of Part IVAAA of the *Taxation Administration Act 1953* and are legally binding on the Commissioner. Taxation Rulings TR 92/1 and TR 97/16 together explain when a Determination is a public ruling and how it is binding on the Commissioner.

Date of effect

This Determination applies for the FBT year commencing on 1 April 1999. However, it does not apply to taxpayers to the extent that it conflicts with the terms of settlement of a dispute agreed to before the date of issue of the Determination (see paragraphs 21 and 22 of Taxation Ruling TR 92/20).

- 1. The benchmark interest rate for the FBT year commencing on 1 April 1999 is 6.50 per cent per annum. This rate replaces the rate of 6.70 per cent that has applied for the previous year.
- 2. The rate of 6.50 per cent is used to calculate the taxable value of:
 - a fringe benefit provided by way of a loan;
 - a car fringe benefit where an employer chooses to value the benefit using the operating cost method.

Example

On 1 April 1999 an employer lends an employee \$50,000 for five years at an interest rate of 5% per annum. Interest is charged and paid 6 monthly and no principal is repaid until the end of the loan. The actual interest payable by the employee for the current year is $$2,500 (50,000 \times 5\%)$. In the current year the taxable value is $$750.00 [(50,000 \times 6.50\%) - $2,500]$.

Note: FBT does not apply to a loan in relation to a shareholder in a private company, or an associate of such a shareholder, that causes (or will cause) the private company to be taken under Division 7A of Part III of the *Income Tax Assessment Act 1936* to pay the shareholder or associate a dividend.

Commissioner of Taxation

28 April 1999
