# TD 2001/4 - Fringe benefits tax: what is the benchmark interest rate to be used for the fringe benefits tax (FBT) year commencing on 1 April 2001?

This cover sheet is provided for information only. It does not form part of TD 2001/4 - Fringe benefits tax: what is the benchmark interest rate to be used for the fringe benefits tax (FBT) year commencing on 1 April 2001?

Units document has changed over time. This is a consolidated version of the ruling which was published on 26 April 2001

### Taxation Determination TD 2001/4

FOI status: may be released Page 1 of 2

## **Taxation Determination**

## Fringe benefits tax: what is the benchmark interest rate to be used for the fringe benefits tax (FBT) year commencing on 1 April 2001?

#### Preamble

The number, subject heading, date of effect and paragraphs 1 and 2 of this Taxation Determination are a 'public ruling' for the purposes of Part IVAAA of the **Taxation Administration Act 1953** and are legally binding on the Commissioner. The remainder of the Determination is administratively binding on the Commissioner. Taxation Rulings TR 92/1 and TR 97/16 together explain how a Determination is legally or administratively binding.

#### Date of Effect

This determination applies for the FBT year commencing on 1 April 2001. However, this Determination does not apply to taxpayers to the extent that it conflicts with the terms of settlement of a dispute agreed to before the date of the Determination (see paragraphs 21 and 22 of Taxation Ruling TR 92/20).

- 1. The benchmark interest rate for the FBT year commencing on 1 April 2001 is 7.55 per cent per annum. This rate replaces the rate of 7.30 per cent that has applied for the previous year.
- 2. The rate of 7.55 per cent is used to calculate the taxable value of:
  - a fringe benefit provided by way of a loan;
  - a car fringe benefit where an employer chooses to value the benefit using the operating cost method.

#### **Example**

On 1 April 2001 an employer lends an employee \$50,000 for five years at an interest rate of 5% per annum. Interest is charged and paid 6 monthly and no principal is repaid until the end of the loan. The actual interest payable by the employee for the current year is \$2,500 (50,000 x 5%). In the current year the taxable value is \$1,275 [  $(50,000 \times 7.55)$  - \$2,500].

#### Note

3. FBT does not apply to a loan in relation to a shareholder in a private company, or an associate of such a shareholder, that causes (or will cause) the private company to be taken under Division 7A of Part III of the *Income Tax Assessment Act 1936* to pay the shareholder or associate a dividend.
