# Fringe benefits tax: What is the benchmark interest rate to be used for the fringe benefits tax year commencing on 1 April 2005?

## Preamble

The number, subject heading, date of effect and paragraphs 1 and 2 of this document are a 'public ruling' for the purposes of Part IVAAA of the **Taxation Administration Act 1953** and are legally binding on the Commissioner.

1. The benchmark interest rate for the fringe benefits tax (FBT) year commencing 1 April 2005 is 7.05 per cent per annum. There has been no change to the rate of 7.05 per cent that has applied for the previous FBT year.

- 2. The rate of 7.05 per cent is used to calculate the taxable value of:
  - a fringe benefit provided by way of a loan; and
  - a car fringe benefit where an employer chooses to value the benefit using the operating cost method.

## Example

3. On 1 April 2005 an employer lends an employee \$50,000 for five years at an interest rate of 5% per annum. Interest is charged and paid 6 monthly and no principal is repaid until the end of the loan. The actual interest payable by the employee for the current year is \$2,500 (50,000  $\times$  5%). The notional interest, with a 7.05 per cent benchmark rate, is \$3,525. The taxable value is \$1,025 (\$3,525 - \$2,500).

4. **Note:** FBT does not apply to a loan in relation to a shareholder in a private company, or an associate of such a shareholder, that causes (or will cause) the private company to be taken under Division 7A of Part III of the Income Tax Assessment Act 1936 to pay the shareholder or associate a dividend.

## Date of effect

5. This Determination applies to the FBT year commencing on 1 April 2005.
