ⓘ This publication provides you with the following level of protection:

This publication (excluding appendixes) is a public ruling for the purposes of the *Taxation Administration Act 1953*.

A public ruling is an expression of the Commissioner's opinion about the way in which a relevant provision applies, or would apply, to entities generally or to a class of entities in relation to a particular scheme or a class of schemes.

If you rely on this ruling, the Commissioner must apply the law to you in the way set out in the ruling (unless the Commissioner is satisfied that the ruling is incorrect and disadvantages you, in which case the law may be applied to you in a way that is more favourable for you – provided the Commissioner is not prevented from doing so by a time limit imposed by the law). You will be protected from having to pay any underpaid tax, penalty or interest in respect of the matters covered by this ruling if it turns out that it does not correctly state how the relevant provision applies to you.

What this Ruling is about

1. This Ruling sets out the Commissioner's opinion on the way in which the relevant provisions identified below apply to the defined class of entities, who take part in the scheme to which this Ruling relates.

Relevant provision(s)

2. The relevant provisions dealt with in this Ruling are:

- Section 9-5 of the *A New Tax System (Goods and Services Tax) Act 1999* (GST Act)
- Division 81 of the GST Act
- Regulation 81 of the *A New Tax System (Goods and Services Tax) Regulations 1999* (GST Regulations)

Unless otherwise stated, all legislative references in this Ruling are to the GST Act.

Class of entities

3. The class of entities to which this Ruling applies consists of all councils that are members of the Local Government and Shires Association of NSW.
4. Within this Ruling the class of entities is collectively referred to as Council.

Qualifications

5. The Commissioner makes this Ruling based on the precise scheme identified in this Ruling.
6. The class of entities defined in this Ruling may rely on its contents provided the scheme actually carried out is carried out in accordance with the scheme described in paragraphs 11 to 16 of this Ruling.
7. If the scheme actually carried out is materially different from the scheme that is described in this Ruling, then this Ruling:
 - has no binding effect on the Commissioner because the scheme entered into is not the scheme on which the Commissioner has ruled; and
 - may be withdrawn or modified.

Date of effect

9. This Ruling applies from 1 July 2013 to all entities within the specified class who entered into the specified scheme during the term of the Ruling. However, this Ruling will not apply to taxpayers to the extent that it conflicts with the terms of a settlement of a dispute agreed to before the date of issue of this Ruling (see paragraphs 75 and 76 of Taxation Ruling TR 2006/10).

Scheme

10. The following description of the scheme is based on information provided by the applicant.
11. Council is registered for goods and services tax (GST).
12. By force of section 220 of the *Local Government Act 1993* (LG Act), Council is a body politic of the State of New South Wales (NSW) with perpetual succession and the legal capacity and powers of an individual, both in and outside the State.
13. Council is empowered under the LG Act to:
- provide goods, services and facilities and to carry out activities, appropriate to the current and future needs of local communities and of the wider public;
 - maintain responsibility for administering the regulatory systems under the LG Act; and
 - manage, improve and develop the resources of their local government areas.
14. Council levies various fees and charges in relation to property development and building applications, and other related approvals and permissions.
15. These fees are levied in accordance with the *Conveyancing Act 1919* (Conveyancing Act), LG Act, *Swimming Pools Act 1992* (Swimming Pools Act), *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act), *Roads Act 1993* (Roads Act), *Environmental Planning and Assessment Act 1979* (EPA Act), *Strata Schemes (Freehold Development Act) 1973* (Strata Schemes Act), *Water Management Act 2000* (Water Management Act) and the *Noxious Weeds Act 1993* (Noxious Weeds Act).

Ruling

16. This Ruling addresses the goods and services tax (GST) treatment where Council imposes a fee or charge for the supply of the following goods or services:
- fees and charges related to property development and building construction applications, and
 - other related approvals and permits, for example, in relation to such things as swimming pools and other facilities.

17. In this Ruling:

- when we indicate that a fee or charge relates to a taxable supply under section 9-5, we assume that all of the requirements of section 9-5 have been met and that the supply is not otherwise GST-free or input taxed under other provisions of the GST Act, and
- if a fee or charge is not consideration for a supply and is not subject to GST by virtue of Division 81, it is referred to as being 'exempt'.

18. The following table sets out the GST treatment.

Fees and Charges	Description	GST Treatment

Appendix 1 – Explanation

ⓘ *This Appendix is provided as information to help you understand how the Commissioner's view has been reached. It does not form part of the binding public ruling.*

Taxable supply

19. Subsection 7-1(1) provides that GST is payable on taxable supplies. As such, Council is liable to pay the GST payable on any taxable supply it makes. Section 9-5 states:

9-5 Taxable supplies

You make a **taxable supply** if:

- (a) you make the supply for *consideration;
- (b) the supply is made in the course or furtherance of an *enterprise that you carry on;
- (c) the supply is *connected with Australia; and
- (d) you are *registered, or *required to be registered.

However, the supply is not a *taxable supply to the extent that it is *GST-free or *input taxed.

(*Asterisked terms are defined in the Dictionary in section 195-1.)

20. As Council is registered for GST and makes supplies in carrying on its enterprise in Australia, the issue that arises under section 9-5 is whether such supplies are supplies for consideration.

21. Section 9-39 provides special rules in relation to making taxable supplies. In particular, item 8 in the table in section 9-39 provides that where there is a payment of taxes, fees and charges the special rules in Division 81 may apply.

Division 81

Australian tax

22. Section 81-5 considers the effect of the payment of a tax. It states:

81-5 Effect of payment of tax

Australian tax not consideration

- (1) A payment, or the discharging of a liability to make a payment, is not the provision of *consideration to the extent the payment is an *Australian tax.

Regulations may provide for exceptions

- (2) However, a payment you make, or a discharging of your liability to make a payment, is treated as the provision of *consideration to the extent that payment is an *Australian tax that is, or is of a kind, prescribed by the regulations.
- (3) For the purposes of subsection (2), the *consideration is taken to be provided to the entity to which the tax is payable, for a supply that the entity makes to you.

23. The term 'Australian tax' is defined in section 195-1 as:

Australian tax means a tax (however described) imposed under an *Australian law.

Australian fees and charges

24. Sections 81-10 and 81-15 consider the effect of certain fees and charges and state:

81-10 Effect of payment of certain fees and charges

Certain fees and charges not consideration

- (1) A payment, or the discharging of a liability to make a payment, it is not the provision of *consideration to the extent the payment is an *Australian fee or charge that is of a kind covered by subsection (4) or (5).

Prescribed fees and charges treated as consideration

- (2) However, a payment you make, or a discharging of your liability to make a payment, is treated as the provision of consideration to the extent the payment is an *Australian fee or charge that is, or is of a kind, prescribed by the regulations.
- (3) For the purposes of subsection (2), the consideration is taken to be provided to the entity to which the fee or charge is payable, for a supply that the entity makes to you.

Fees or charges paid for permissions etc.

- (4) This subsection covers a fee or charge if the fee or charge:
 - (a) relates to; or
 - (b) relates to an application for;

the provision, retention, or amendment, under an *Australian law, of a permission, exemption, authority or licence (however described).

Fees or charges relating to information and record-keeping etc.

- (5) This subsection covers a fee or charge paid to an *Australian government agency if the fee or charge relates to the agency doing any of the following:
- (a) recording information;
 - (b) copying information;
 - (c) modifying information;
 - (d) allowing access to information;
 - (e) receiving information;
 - (f) processing information;
 - (g) searching for information.

81-15 Other fees and charges that do not constitute consideration

The regulations may provide that the payment of a prescribed *Australian fee or charge, or of an Australian fee or charge of a prescribed kind, or the discharging of a liability to make such a payment, is not the provision of *consideration.

25. The term 'Australian fee or charge' is defined in section 195-1 as:

Australian fee or charge means a fee or charge (however described), other than an Australian tax, imposed under an *Australian law and payable to an *Australian government agency.

Australian law

26. The term 'Australian law' is defined by section 995-1 of the *Income Tax Assessment Act 1997* (ITAA 1997) and relevantly includes a State law. It includes acts and law making powers which are delegated by parliaments, such as regulations, by-laws, proclamations and orders made under Acts.

Australian government agency

27. The term 'Australian government agency' is defined by section 995-1 of the ITAA 1997. 'Australian government agency' means:

- the Commonwealth, a State or Territory; or
- an authority of the Commonwealth or of a State or a Territory.

28. For the purposes of Division 81, it is accepted that Council comes within the definition of an Australian government agency.

GST Regulations

29. Division 81 gives effect to the principles contained in the *Intergovernmental Agreement on Federal Financial Relations* (Intergovernmental Agreement). Payments of taxes are exempt from the GST. Payments of fees and charges generally constitute consideration and if the requirements of section 9-5 are satisfied, the payment is for a taxable supply. Some supplies are excluded and are exempt. Division 81 provides for Regulations that prescribe payments that constitute consideration for a supply and, conversely, prescribe payments that do not constitute consideration.

Australian fees and charges that constitute consideration

30. Regulation 81-10.01 of the GST Regulations sets out those fees and charges that do not fall within the principles contained in the Intergovernmental Agreement, and therefore supplies to which they relate are not intended to be exempt from GST. These fees or charges include a fee for the non-regulatory provision of information and a payment for a commercial sale of books by a government bookshop. These fees or charges are treated as consideration for a taxable supply if the other conditions of section 9-5 are met.

31. Regulation 81-10.01 of the GST Regulations also ensures that the regulatory activities of government made in competition with the private sector are subject to GST where the other requirements of section 9-5 are satisfied.

32. The ES explains that the regulations ensure that the regulatory activities of government made in competition with the private sector are subject to GST where the other requirements of section 9-5 are satisfied. It states:

Fees and charges in this category are not excluded from being consideration for a taxable supply. This is consistent with the National Competition and Consumer Policy guidelines and ensures that a government entity is not given a competitive advantage over a private sector supplier making the same type of supply

This covers situation in which government agencies have authorised private agencies to perform activities that form part of a regulatory process to be followed. Where government agencies, as well as government certifiers, have authorised private certifiers to perform certification activities these fees and charges will continue to be consideration for a supply that is subject to GST. This ensures competitive neutrality between supplies made by government and non-government agencies.

This paragraph applies only where a government agency is providing a supply in a competitive market, or where private suppliers have been accredited or authorised to make a supply over which the agency would otherwise have a monopoly.

This paragraph does not cover supplies of information that are regulatory in nature and can only be supplied by government agencies, notwithstanding that the public may obtain such information through a private sector supplier acting as a conduit for the information from the government agency. The supply is only a taxable supply where the private sector entity charges for the supply in its own right.

Australian fees and charges that do not constitute consideration

33. Regulation 81-15.01 of the GST Regulations sets out those fees and charges that are prescribed for section 81-15 and which do not constitute consideration. Because these fees and charges do not constitute consideration, the supplies to which they relate, if any, do not satisfy the requirements of section 9-5 and are not taxable supplies.

34. Those prescribed include a fee or charge imposed on an industry to finance regulatory or other government activities connected with the industry and a fee or charge for a supply of a regulatory nature made by an Australian government agency.

35. If a payment is not the provision of consideration because it is covered by subsections 9-17(3) or (4), then it is not a prescribed fee or charge to which subsection 81-10(2) would apply.

Australian fees and charges covered by both regulations 81-10.01 and 81-15.01 of the GST Regulations

36. If a fee or charge is covered by both regulations 81-10.01 and 81-15.01 of the GST Regulations, regulation 81-15.02 of the GST Regulations determines which regulation would prevail. For example, a fee for recovering the costs for usage of facilities is covered by both paragraph 81-10.01(c) and paragraph 81-15.01(d) of the GST Regulations. In such a situation, subregulation 81-15.02(2) of the GST Regulations provides that paragraph 81-10.01(c) of the GST Regulations would prevail and the fee would constitute consideration.

Notes

37. **Note 1** – Where fees and charges can be provided in a competitive market by an entity that is a non Australian government agency they are not exempt under Division 81. These supplies may satisfy subsection 81-10(4) as being the provision of a permission or paragraph 81-15.01(1)(f) of the GST Regulations as being for a supply of a regulatory nature by virtue of section 81-15, however, subregulation 81-15.02(2) applies to treat the payment as being for consideration if the fee or charge is also covered by paragraph 81-10.01(1)(h) of the GST Regulations. Paragraph 81-10.01(1)(h) of the GST Regulations is about a fee or charge for a supply that can also be made in a competitive market by an entity that is not an Australian government agency.

38. **Note 2** – Advertising fees for applications under the EPBC Act were previously treated as taxable supplies. However, the effect of the Division 81 amendments mean that from 1 July 2011 the fee and charge can be treated as exempt as it is the provision of a permission for the purposes of subsection 81-10(4).

39. **Note 3** – Some fees or charges were previously treated as exempt because the fee or charge was listed in the Treasurer's Determination. However, the fee or charge becomes taxable from 1 July 2013, for example because it is a fee or charge to which paragraph 81-10.01(1)(h) of the GST Regulations applies.

40. **Note 4** – A fee, for example a development application collected by council on behalf of an approval authority, is not the provision of consideration for any supply Council has made. However, it may be for the provision of consideration for a supply made by another entity. The entity making the supply is required to assess the GST treatment of the supply.

41. **Note 5** – An additional fee, where for example a development consent, construction certificate or complying development certificate was not obtained and a penalty was issued as a result, does not satisfy the requirements of section 9-5 and is therefore exempt. Additionally, other fees, for example a fee to issue an order or notice of intention to issue an order, are exempt because they do not satisfy the requirements of section 9-5 and are in the nature of a penalty or fine.

42. **Note 6** – The fee for a pre-lodgement meeting for a construction certificate or complying development certificate and the fee for a pre-DA meeting is for the provision of consideration because of paragraph 81-10.01(1)(e) of the GST Regulations and is a taxable supply. This advice is pre-lodgement advice that relates to the provision of a permission for the purposes of subsection 81-10(4) and it is not compulsory to seek the advice.

43. **Note 7** – Reinstatement fee does not satisfy section 9-5 because there is no supply being made and is merely a supply for damages (Goods and Services Tax Ruling GSTR 2001/4: Goods and services tax: GST consequences of court orders and out-of-court settlements).

44. **Note 8** – Road lease fee is for the provision of consideration and is a taxable supply under section 9-5 because of paragraph 81-10.01(1)(g) of the GST Regulations. The fee is of a non-regulatory nature.

45. **Note 9** –The development application (bundled fee) and any certificates such as construction or occupation certificates requires unbundling to ascertain the GST treatment of the individual fees. The fee for the development application is exempt under subsection 81-10(4). However, the fee for the construction and occupation certificates is taxable under subsection 81-10(2) as these supplies can be provided in a competitive market by an entity that is not an Australian government agency (see note 1 at paragraph 38 above).
