PREAMBLE Sub-item 120(1) in the First Schedule to the Sales Tax (Exemptions and Classifications) Act exempts from sales tax clothes for human wear, (other than furs), made of any material whatsoever, including cloth, glass fibre, leather, rubber or plastic material.

FACTS 3. Protective helmets worn by motorcyclists and cyclists are available in a range of designs and materials. The kind worn by professional racing motorcyclists are generally made of stronger material such as fibreglass or plastic, are well padded and fitted with visors for eye protection. The kind worn by the motorcycling public are similar to those worn by professional motorcyclists but vary in quality, generally being less expensive.

4. Cyclists helmets generally are of two kinds. The first kind is a hard plastic or fibreglass helmet with internal padding. It is generally not fitted with a visor. Some helmets provide protection for the ears while others do not. The second kind is the padded leather or vinyl headgear which is worn mainly by professional cyclists.
