OUR COMMITMENT TO YOU

We are committed to providing you with guidance you can rely on, so we make every effort to ensure that our publications are correct.

If you follow our guidance in this publication and it turns out to be incorrect, or it is misleading and you make a mistake as a result, we must still apply the law correctly. If that means you owe us money, we must ask you to pay it but we will not charge you a penalty. Also, if you acted reasonably and in good faith we will not charge you interest.

If you make an honest mistake in trying to follow our guidance in this publication and you owe us money as a result, we will not charge you a penalty. However, we will ask you to pay the money, and we may also charge you interest. If correcting the mistake means we owe you money, we will pay it to you. We will also pay you any interest you are entitled to.

If you feel that this publication does not fully cover your circumstances, or you are unsure how it applies to you, you can seek further assistance from us.

We regularly revise our publications to take account of any changes to the law, so make sure that you have the latest information. If you are unsure, you can check for more recent information on our website at ato.gov.au or contact us.

INTRODUCTION

HOW TO USE THIS BOOKLET

An accurate description of the taxpayer's main business activity and its five-digit code must be shown at the correct items on relevant tax returns and schedules.

The industry description and code should relate to the activity from which the business derived the highest gross income or incurred the smallest loss.

Business industry codes 2017 contains two code lists – the first is alphabetical and starts on page 1; the second is numeric and starts on page 21. Select the most appropriate code to enter on your tax return. Do this by searching under keywords that describe the taxpayer's main business activity.

For example:

- Abalone fishing – search under the keyword 'abalone' to find code 04191
- Black coal mining – search under the keyword 'coal' to find code 06000
- House painting – search under the keyword 'painting' to find 'Painting of buildings or other structures' code 32440

Once you have identified the most appropriate code from the list, enter it at the correct item and corresponding label of the tax return and/or schedule. Show all numbers in the code, including any leading zeros.

If a code cannot be selected using the alphabetic list, your second option is to use the numeric list. Here you need to search for the main business activity of the taxpayer under broad business category headings.

For example, if the taxpayer's main business activity is trawling for tuna, you would search under headings related to this type of business. In this case, the best heading would be 'Fishing'. Under this heading an appropriate entry 'Trawling for fin fish', code 04140, will be found. This code should then be entered at the correct item and corresponding label on the tax return.

Only use codes from *Business industry codes 2017*, and take care to describe your business activity as accurately as possible. An incorrect code may result in clients not receiving necessary service or material from the ATO, or could lead to incorrect targeting of compliance activities.

USE OF INDUSTRY CODE INFORMATION

Industry code information is widely used by organisations and researchers for various reasons. Of interest to tax agents and accountants would be **Industry benchmarks** published in *Taxation statistics* available on our website, ato.gov.au
